

A Game

The background is a complex abstract composition. It features a dark teal base with various geometric elements. There are several triangles in teal and purple, some solid and some outlined. A large, white, rounded rectangle is centered, containing the text 'A Game'. The rectangle is overlaid with a network of thin white lines that crisscross it. In the top right, there is a purple circle. The right side of the image has a pattern of small blue dots. The bottom left has a pattern of small purple dots. The overall aesthetic is modern and digital.

metaverse

AG is based on gamefi ecology and Web3 0 Ying's model token is committed to creating a completely decentralized game ecosystem. The mechanism model is open and transparent, continuously consumed in games and applications, and stably added value. It is the world's first quiz pass model

The way to participate in the quiz game is to first buy Ag in pancakes and exchange it into stable currency in DAPP to participate
More users can participate in the game in the Ag guessing pool,

Play structure

The early opening reference is the data of the world's largest exchange currency security K-line. The data is open and fair. In order to ensure the authenticity and credibility of the data obtained, we will adopt the form of Oracle. As we all know, the main thing of Oracle is to process the requests provided by smart contracts in the blockchain and transfer some information and data outside the chain to the chain. Therefore, the Oracle is considered as a bridge between the decentralized protocol and the external data of the blockchain, which is why the Oracle is essential.

metaverse

The diversified products of the world cup and the European Cup have been opened one after another. So with the enthusiastic participation of quiz lovers. The market demand of Ag will also be greater and greater, and the price will naturally rise

AG development route

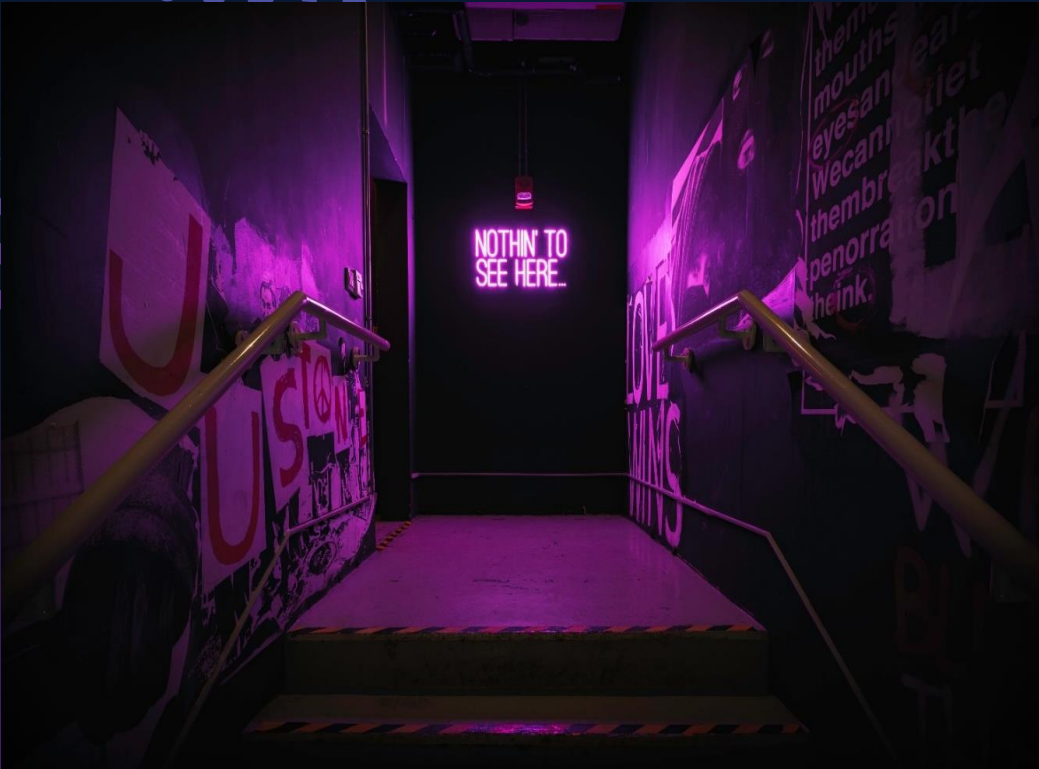

How do we join

- Hold AG and invest in community sermon value.
- Participate in the game, jointly preach ecological construction, enjoy AG ecological dividends, and share WEB3.0 wireless dividends.
